Abstract: The paper submits the achievement of an application for facilitating the achievement of a strategic plan necessary to an educational manager, that is a teacher whose experience and managerial knowledge are often minimal, if not absent. There has been achieved an informatic application by means of which, using the prefigured data base, any manager could built a strategic plan for the organization he/she is leading as to his/her personal vision but using a number of elements that could direct his/her step.

Keywords: database, strategy, tactics, management .
