**Abstract:** Generally, the proposals that imply public expenses overcome the resources available to finance them. That is why, the choice between diverse options and the establishment of priorities are inevitable responsibilities of public authorities. A systematic evaluation of all proposals that imply the public sector offer the certainty of some adequate choices and the obtaining of a corresponding value for the granted money. The evaluation of the impact of such an approach helps those that create the politics to realize this desiderate. In this context, the evaluation of the impact is an analytical approach, based on information, that refers to the evaluation of the probable costs, the consequences and the secondary effects of the planned public politics (laws, regulations, etc.).

**Keywords:** public politics, conformation costs, public benefits, efficacy of the public politics
