**Abstract:** The performance's measurement achieved by a social organization is considered to be a necessity. The request occurs due to interconnection between the three sectors of a society: public, private and nonprofit, indispensable interconnection in development of a society and for the organizational success. If the obtained results in the sector is not materialized in a profit what is the logic of existence for the non-governmental sector? What are the outcomes of these social entities? What role do they play in the interconnection of sectors? Moreover, which is the visibility of this sector in Romania? In this paper, the authors aim is to draw the picture and give a preview of what it means performance in non-profit sector and the role it plays in Romania.

**Keywords:** Romanian non-profit sector, social organizations, performance, measurement indicators
