Abstract: In 2002 we can talk about the transition from a passive form, i.e. the unemployment benefit allowed to the unemployed to active employment measures of labor (which consist of mediation / placement services, information and career counseling, vocational training, employment subsidies, training in the techniques of finding a job, promotion of private initiative, etc.), so that, in the period 2002-2008, there was a decrease in the number of the unemployed. At the end of 2008, our country begins to feel the consequences of the global economic crisis, and during 2009 the unemployment rate curve is going upward.

Keywords: passive form, unemployment benefit, unemployed, active measures, employment, unemployment.
