Abstract: The paper presents the basic details related on The Sectorial Operational Programe for Human Resources Development (SOPHRD). The program is cofinanced by Romanian Government and European Union and represents the support to enhance the quality standards for education and training activities. The program is structured on seven axes and twenty-one Major Areas of Intervention (MAI). In the paper are synthetized the results of the analysis for the projects belonging to the Priority Axis 1 and one major area of intervention of the axis 2. That projects were implemented under the ages of the Ministry of National Education (MNE). A database was developed in order to make the analysis. Eight criterions were defined in order to analyze the projects. The conclusions of the analysis are a good platform to define the approaches to improve the efficiency of the projects to be developed in the stage 2014-2020.

Keywords: structural funds, analysis, training, human resources, innovation.
