**Abstract:** The millennium in which we live face one of the most discouraging challenges given the fact that most valuable resource is represented by the capabilities of imagination, creativity and innovation and the greatest danger that threatens us is that we look at the future without investing heavily in such capacity. This challenge should be a wake-up call for the education system that is the key to the future of education whereas and its stakes could hardly be higher. The purpose of this article is to highlight the importance of intellectual property policies in universities and research centers. The conclusion of this research emphasize the need to include in universities and research centers intellectual property policies.

**Keywords:** intellectual property policies, universities, technology transfer, research centers
