**Abstract:** The paper presents the results of a quantitative research on ethics that has been achieved in twelve different European countries. The method that has been used was the boring, and the research instrument was the questionnaire. The size of the sample was 74 organizational subjects, using a non-aleatory sampling, based on accessibility. The research focuses on the importance of business ethics in the European organizations so that they will become as competitive as possible in the 21<sup>st</sup> century.

**Keywords:** ethics, European organizations, quantitative research
