**Abstract:** People are the most valuable asset of an organization. This is stated by all managers, trainers, consultants and authors. But people need to be committed. What influences the level of commitment and how can this level be raised and maintained? In this paper are presented three factors which can be vital: awareness, accountability and trust. A fourth factor is also highlighted: respect.

**Keywords:** quality, awareness, trust, responsabilization, quality management, communication, organizational culture, commitment, organization, people
