Abstract: In this article the authors make an analysis of work accidents recorded in county of Sibiu and a private organization. They highlighted: the number of work accidents divided in the level of severity and the mild accidents in the 2011-2015 period. Finally the authors revealed the main causes of the accidents produced in the analyzed organization and that the report concludes a drastic decrease in the number of accidents. They explain that this decrease is due to prevention and protection plan implemented by the company analyzed.

Keywords: work accident, collective accidents, disabling accidents, fatalities, mild accident, number of deaths, number of injured, causes, prevent and protection plan.
